

Integration & Allocation Plan

Share your Integration & Allocation Plan by May 9, 2024.

The purpose of the Integration & Allocation Plan is to help you develop a family engagement strategy for the 2024-2025 school year that:

- Is integrated into existing priorities (e.g., school improvement plans, instructional goals, school climate strategies, etc.)
- Involves new and/or re-purposed investments (e.g., increased staff time to partner with families, PD funding, etc.)
- Applies existing management tools (e.g., hiring practices, policies, etc.)

What are you going to do differently next year based on what you've learned this year?

(Name some specific actions, but keep it simple! Examples include: changing the way you do parent-teacher conferences and using PD & staff time to prepare and practice, providing staff with professional development focused on family engagement, making bi-monthly phone calls home for every student, doing monthly community walks, etc.)

What is the purpose/goal of the things you plan to do differently next year?

(Think about the *meaning* behind your actions. Examples include: ensuring family engagement strategies are directly linked to learning goals, building trust with families, changing staff mindsets, etc.)

What resources are you going to deploy in order to achieve your goals?

(Examples include: new budget line items, forming new or utilizing existing committees/teams to lead this work, etc.)

How does your resource plan map onto existing school plans and priorities?

(Examples include: copy/pasted language from school plans, or a new description written here that connects the family engagement strategies described above to key school/department priorities. Feel free to also share with us any of your school plans that include reference to your new family engagement strategies)
